Bespoke Certified Training

TRAINING

Hanoi, Vietnam

The effectiveness of your evidence depends on officers and staff's training, education, and experience. Providing upto date certified training that focuses on "hands-on" practical instruction allows practitioners to stay ahead of new and emerging technologies and software applications.

Training is provided on ALL systems manufactured and supplied by Daetech.

The field of Digital Forensics and Forensic Video Analysis is a complex discipline that requires understanding of procedures and practices.

The systems, solutions and software tools used by practitioners in the field of Digital Forensics require a deep understanding.

Daetech believes that hands on practical training with experienced instructors is essential to the students development.

The understanding of "why" is just as important as the "How".

recognition for making this a safer world

"An investment in knowledge always pays the best interest."

Benjamin Franklin

Indonesia

Daetech provide training courses with the host agency in country, alternatively training classes can be arranged in the UK. Classes are provided on a per client basis to ensure that students maximise their learning and understanding for their agency.

Indonesia

Qatar

Abu Dhabi

Training is provided on all aspects of the bespoke solutions and software that Daetech manufacture and provide. Practice sessions are essential to students understanding all features and functions of the forensic solutions.

Dubai

All training manuals, video samples and presentation material is provided by Daetech in a clear and concise way allowing students to easily understand the instructions and requirements.

Working closely with Partners in country and end user clients, Daetech provide training tailored around working, cultural and religious needs and requirements including adjusting start and end times of courses to working closely with interpreters supplied by the end user.

Courses contain at least 80% "hands on" practical sessions where students are paired together per system. "students working together in pairs allows for greater understanding by sharing advice, it allows them to reach their goals quicker by being challenged and motivated by their peers.

Daetech provide a rolling program of training that includes beginner, intermediate and advanced. Daetech also provide refresher training.
