

Digital forensic triage for the frontline

SPEKTOR Kiosk is the desktop member of the SPEKTOR family – the game-changing forensic toolset that allows those in the field to rapidly preserve and automatically examine data stored on computers and mass storage devices.

It has been designed specifically for use by non-technical investigators and is trusted by law enforcement and governments around the world.

SPEKTOR Kiosk provides another hardware option to help transform the operational velocity, quality and efficacy of collection and analysis in the field. It's the perfect fit for outlying sites such as border checkpoints and evaluation areas as well as offices, evidence suites and labs.

KIOSK
SPEKTOR

1

Easy to use

Interactive touchscreen and guided workflows keep training to a minimum, letting nontechnical operators pick up the workloads previously the preserve of specialists.

2

Reduced backlogs

More SPEKTOR hardware options make it easier to scale up and deploy the appropriate resources, with its flagging of priority content helping to accelerate throughput and lower costs.

3

Rapid results

SPEKTOR has set a new performance standard. It gives you the earliest intelligence possible, with its ultra-fast collection and smart analysis capabilities giving you evidential insights on the spot.

4

Cost-effective

The speed, ease and defensibility of SPEKTOR-enabled collections lightens the load on labs and investigative teams, minimising inefficiencies and maximising value.

5

Reduced risk

The more thorough, faster and forensically sound the collection and triage, the greater the chances of catching the data that will support your investigation and minimise missteps.

The best in forensic triage wherever and whenever you need it

KIOSK
SPEKTOR

Plug and go

SSD, HDD, USB, PC, Mac

Plug in your device and follow the guided workflow: login, device identification, collection, analysis and review, report creation. Administrative users maintain control, configuring permissions, workflow and search criteria.

Ultra-fast collections

PC, Mac, Linux & removable storage

Our unrivalled technology has SPEKTOR completing collections in minutes against live or powered off systems and removable storage devices.

Rapid Imaging

USB, SATA, USB-C, Network

Simultaneous imaging of multiple removable media devices and computers via USB, SATA and USB-C, with option to image to a network location.

Instant search

Keywords, hashsets & more

Store thousands of keywords and millions of hash values in multiple lists organised into categories of your choice. SPEKTOR automatically detects a number of common data formats such as valid bank card and IMEI numbers.

Power review

Files, user actions, shared reports

View images and multimedia, read documents and email, review chat and social media, reconstruct online activity, save reports to the network, get the forensic picture - fast.

Integrity assured

Process driven

SPEKTOR enforces total control and audit of the entire process life cycle. All user and system actions are recorded, collected data is hashed and the user is guided through the entire process.
