

# Evimetry Imager

## SIMPLE IMAGING. FASTEST SPEEDS.

Evimetry Imager is the fastest forensic imaging solution. It provides a fast, simple, and safe way to create physical disk images by booting from a USB flash drive or hard drive.

### FAST

Acquire as fast as your hardware is capable of. Using a single USB connected SSD storage drive, acquire at rates of around 20 GB/min. With Imager Multi, image to multiple evidence storage devices at the same time, to reach speeds in the 100's of GB/min.

### WORKS WITH YOUR CURRENT TOOLSET

Evimetry's AFF4 images are simply consumed using our freely available Filesystem Bridge, and a growing number of commercial and open source tools.

### FORENSIC OS IMAGING DONE RIGHT

Evimetry Imager provides fast and simple forensic imaging of Intel Macs & PC's via a Linux-based Forensic Operating System.

### FOOLPROOF WRITE BLOCKING

Evimetry Imager automatically manages write blocking, and will only write to evidence storage devices that have been whitelisted or "Blessed" as good for writing to.

### EASY TO PROVISION

Create Evimetry Imager USB boot devices with only a few mouse clicks. For large USB disks the remaining space is configured and "Blessed" for storing evidence. Great for low-port count modern laptops.
