

A central repository for organizations to build intelligence over time

Griffeye Enterprise enables case files to be easily accessed across an organization, and extracted with ease in new investigations—helping you work together, build on each other’s knowledge and optimize results.

**Multiple cases.
Multiple users.**

For large agencies and organizations pursuing ongoing investigations, Griffeye Enterprise provides a dynamic repository for building intelligence over time.

Key advantages

Drive long-term investigations and collaborative work

- Multiple users gain access to a unified database, where they can build on each other’s intelligence work
- Data from past investigations is stored and easily retrieved for use in current investigations
- Information from other systems is easily migrated over, as well as exported for easy sharing
- User access control and extensive audit logs create a secure environment for collaboration

Accumulate knowledge over time

Stored knowledge becomes an asset for the future and can be used by new people on their first day. It also means that knowledge remains in an organization when individuals leave.

Manage and organize with ease

The dashboard view provides an easy overview of the information and collaborative efforts.

Included resources

Entity Management

Entity Management lets you detect and trace entities (such as persons, vehicles and objects) across your entire file database to map relationships and highlight critical clues.

Griffeye Brain (AI)

Runs automatically in the background during import and scans through previously unseen footage to detect and flag relevant material, including CSAM, objects and media types.

Griffeye Intelligence Database (GID)

Working in Griffeye Enterprise, you have access to the GID to seamlessly share intelligence with other investigators—within teams and across borders.

Griffeye Forensic Market

An extensive digital marketplace gives you access to various valuable apps and add-ons, allowing you to add new functionality as your needs change.
