

Authenticate media and counter manipulated content

Protect the integrity of your investigations with Magnet Verify. Confidently authenticate images and video, detect manipulations, and ensure evidence you can trust.

The challenge

Digital media plays a critical role in modern investigations but is often compromised by tampering, deepfakes, and missing metadata. Investigators need a trusted tool to validate media and provide legally defensible evidence.

A patented approach to media authentication and source identification

Unlike any other solution, Magnet Verify uncovers critical insights beyond standard metadata and visible content, empowering investigators with new levels of reliability in digital media authentication.

Key benefits

Magnet Verify allowed us to rapidly identify CSAM production on a device. Without Verify, this would not have been possible.”

K.S.

Special Victims Unit Detective
Middlesex County
Prosecutor's Office

Advanced media authentication

Detect alterations, synthetic media generation, and metadata manipulation, while also confidently identifying and authentication camera-original media.

Source and provenance identification

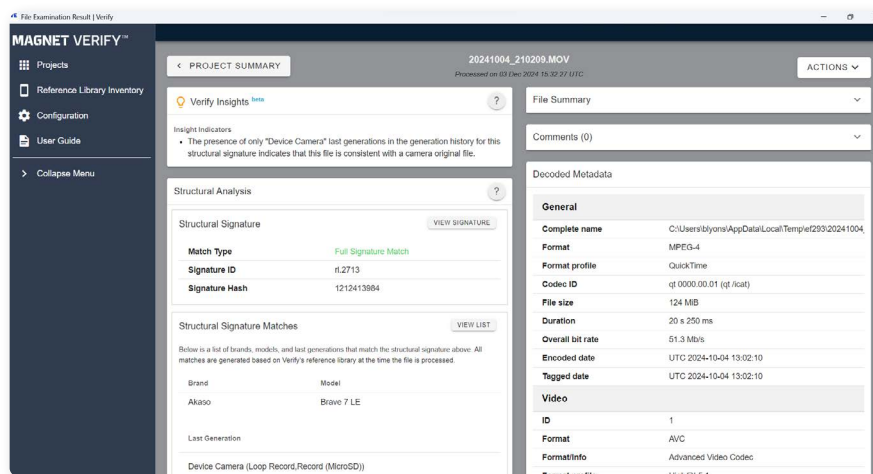

Trace media files to their originating device, track their path, and ensure chain of custody for legally admissible evidence.

Synthetic media and deepfake detection

Expose deepfakes, synthetic media, and AI-generated content to identify non-authentic media and counter disinformation.

Court-admissible evidence

Ensure media evidence meets legal standards with reliable, repeatable reports that hold up under court scrutiny.

Example use cases

Magnet Verify enables law enforcement and legal professionals to confidently rely on their evidence, ensuring it meets the highest standards of court admissibility.

- **Streamline CSAM investigations**
Identify first-generation CSAM and save time by excluding synthetic files.
- **Support legal proceedings**
Provide attorneys and prosecutors with validated, court-admissible media evidence.
- **Authenticate citizen-submitted video**
Confirm the authenticity of videos submitted via portals or social media for actionable evidence.
