Advanced Evidential Retrieval

Forensic Data Collection

Integrated Standard Operating Procedure

MIDAS-R

Mobile Image & Data Acquisition System

Retrieval

CCTV Surveillance and Multimedia Evidence is on the rise. The thousands of manufacturers and systems cause challenges in the retrieval of the evidence due to numerous connections and formats

With the MIDAS-R, your evidence can be retrieved and analysed in no time at all whilst ensuring forensically sound procedures and capture.

A bespoke system designed around international operational policing requirements for best evidence.

With multiple connection options and integrated HDD cloning the MIDAS-R allows on-scene recovery from analogue and digital CCTV and multimedia sources.

The unique combination of the latest hardware and compatability with multiple software applications makes the MIDAS the only fully loaded system of its kind globally.

The Ultimate Mobile Retrieval Solution

Interoperable with
Digital Evidence Management
and Digital Evidence Storage
solutions.

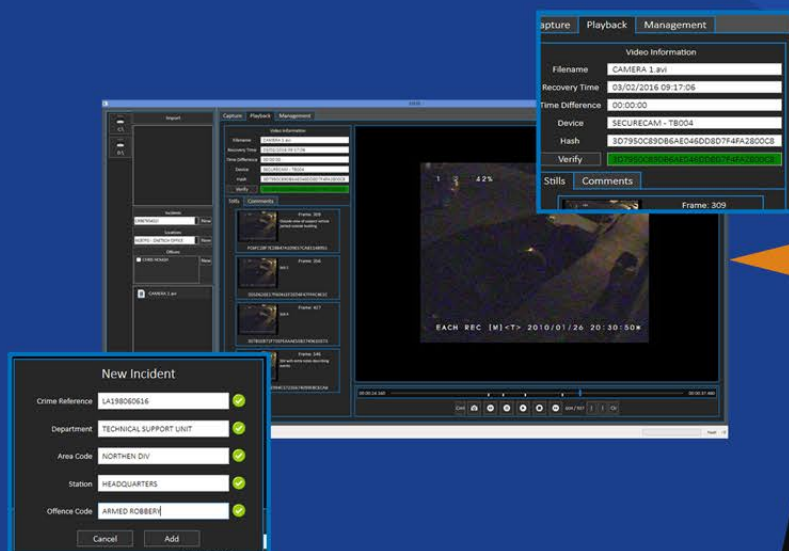

Integrated Standard Operating Procedures & Forensic Analysis

Any Connection

Any Format

The MIDAS-R has been designed around functionality and simplicity, with intuitive user interfaces and easy connection guides.

The MIDAS-R comes pre-loaded with Daetech's bespoke Evidence Management Suite (EMS). The software has been designed from the ground up with integrity of evidence and procedures in mind whilst maintaining simplicity of use.

The software suite utilising an integrated Standard Operating Procedure guides officers through a set workflow with visual verification after each text input.

Manage all Data and Evidence files

Create Viewing Logs

Hash Verification

Time Stamped Notes

Auto Report Generation

Engineered to meet the challenges of 24/7 policing

The MIDAS-R is a fully Bespoke system from the design of the case through to it's functionality.

With its capabilities designed around operational policing. MIDAS-R can be configured to clients specific operational and environmental needs.

By installing an agencies existing licenses for software applications such as Forensic video Analysis, Facial Recognition, Audio Forensics Editing and Mobile Forensics enables the MIDAS to be a fully portable Digital Forensic Laboratory.

Daetech Systems as a systems integrator has close relationships with many suppliers of specialist software and can supply the system fully loaded to a customers specification.

Example Specification

System Drive	500gb SSD OS Drive
Media Storage	2Tb Evidence Store
Memory	16Gb Ram
CPU -	Intel i7
GPU	Nvidia CUDA
OS	Windows 10
Power	Mains Dual 110Ac/240Ac

Maintaining Best Evidence

The MIDAS -R comes with an integrated, user friendly hard drive cloning circuit. The unit can be used as a standalone HDD duplicator with no connection to the host MIDAS PC, delivering an exact 1 to 1 clone of the target hard drive including partition and boot sector information, the Host Protected Area (HPA) as well as user data.

Alternativley the unit can be switched into USB Mode allowing both the master and the target drive to viewed and browsed within Microsoft windows, whilst write protecting the master.

The MIDAS-R is a fully Bespoke system from the design of the case through to it's functionality. With its capabilities designed around operational policing. MIDAS-R can be configured to clients specific operational and environmental needs.
