

iVe Mobile

Download the iVe Mobile App

iVe Mobile

Enabling investigators to identify vehicles supported by iVe, determine which systems are installed, know what data can be retrieved, and how to acquire the data, all prior to taking action. Key features include:

+ VEHICLE LOOKUP

Quickly determine if a vehicle is supported by iVe and what data can be acquired. Positively identify systems installed in a vehicle using the visual cues and what data can be retrieved.

+ INSTRUCTIONS

View step-by-step instructions for identifying supported vehicle systems, removing systems from a vehicle, and preparing to run an acquisition.

+ NOTIFICATIONS

Receive notifications when supported vehicles are added, acquisition instructions are updated, and when acquisitions being remotely monitored, are successfully completed.

+ CONTENT VIEWER

View and share collection summaries and the contents of collections within the content viewer, all while on the go.

HOW TO GET STARTED

1. **DOWNLOAD** iVe Mobile from the iOS App Store or Google Play using the search term "Berla".
2. **SET UP AN iVe ACCOUNT** You will need an iVe Account to log into iVe Mobile.
If you do not already have one, request an account after installing and launching iVe Mobile.

iVe is a vehicle forensics solution for identifying, acquiring, and analyzing critical data from vehicle systems while conducting an investigation. iVe can uncover critical information stored within vehicle systems and help determine what happened, where it occurred and who was involved.

Get started with iVe Mobile and identify which vehicles are holding critical information.
